

Say goodbye to hot visco memory foam... and hello to **FELIPE!**

FINALLY AFTER
25 YEARS
OF TRIALS

We have developed the most revolutionary viscoelastic foam. Our open cell viscoelastic foam has all the properties of a viscoelastic-memory foam but is breathable, there by reducing the heat issue of visco-memory foams.

You receive the benefits of open cell technology while having the pressure reducing applications of viscoelastic foam.

We combine our breathable FELIPE foam with our high-resilience foams to create an incredibly comfortable mattress.

- Drier in high humidly locations.
- Withstands up to 350 lbs.
- Sag/comfort factor above 2.5
- Can be made for bariatric application with the same foam combination in an 8-inch depth.

We are HYPER-responsive to our customer needs and believe we offer the best value proposition in the market, as well as the most advanced technology to date in foam.
