

AUSTIN HEALTHCARE S O L U T I O N S

We are committed to making the most technologically advanced and comfortable support surfaces for both home and medical applications.

We are **problem solvers**

We like challenges and are hyper-responsive to our customers' needs.

We manufacture the best comfort products with the most technologically advanced materials.

We are a company born in 1997 out of the desire to improve the life of patients through superior comfort surfaces. We firmly believe in providing long-lasting, high-value products with resilience factors above 55% — an essential factor in the comfort level of a mattress.

We are proud of our NOAH Acute Care Mattresses, which removes excess surface heat and moisture, while its resilience and softness reduces pressure ulcers.

We love to design products that are customer specific, specializing in mattresses, emergency sheets, stretchers, and acute care products. We are continually innovating, whether it be a mattress with both firm and soft sides or advanced high-density foams for bariatric patients. We also offer specialty covers, including ones with sensors that monitor patient movement.

Our home office is located in Austin, Texas. We have two distribution warehouses located in Laredo, Texas, and San Diego, California.

We can manufacture any foam product with virtually any type of vinyl or fabric, in just about any dimension.

FINALLY AFTER
25 YEARS OF TRIALS

Introducing our two new **REVOLUTIONARY FOAMS**

FELIPE represents a new generation of reticulated open cell memory foam. It is specially designed to target the main weaknesses of conventional memory foam. By introducing its breathable open-cell nature it enables the release of body heat, providing greater comfort.

NOAH is our carbon-based open cell memory foam which has a physical structure that allows the foam to self-ventilate. Moisture is able to travel throughout the material while dispersing body heat.

FELIPE

NOAH

For more information on these remarkable foams, visit our website austinhealthsolutions.com

Introducing our new

Noah Acute Comfort Care Mattress

We combine our breathable **NOAH** and **FELIPE** memory foams with our high-resilience foams to create this incredibly comfortable surface. It is the perfect combination for intensive care applications where a less humid bed surface is critical.

Our **Pressure Redistribution Technology** is comprised of our two new proprietary open cell viscoelastic foams.

SKU	Size
NAC3576	35"X76"
NAC3580	35"X80"
NAC3584	35"X84"
NAC3976	39"X76"

NAC3984	39"X84"
NAC4276	42"X76"
NAC4280	42"X80"
NAC4284	42"X84"

NOAH and FELIPE are the only foams in the world that remove excess heat and moisture by allowing air to pass through them without losing their properties. You receive the benefits of open cell technology as well as having the pressure reducing applications of viscoelastic foam which assists in the reduction of pressure ulcers.

HRM4284	42"X84"

Our **High Resilience** and **Smart-Turn** Mattresses are built with medical grade foam, offer firm side-rails for better support, have soft feet to reduce pressure ulcers, withstand up to 350 lbs., and have both a sag/comfort factor above 2.5 and a 55% resilience.

All of our mattresses can be custom designed to your specifications, including bariatric requirements. All of our mattresses include a fire barrier and are shipped compressed for easy handling. For additional personalization, we can add your logo or graphic.

Smart-Turn Mattress

SOFT FOR MAXIMUM COMFORT
TURN IT!
FIRM FOR MAXIMUM SUPPORT

The **Dual Density Mattress** is made to attend to different patient needs, a firm side, and a soft side. The **firm side** is for patients that prefer more support and pressure redistribution. The **soft side** is made with a high density, high resilience super soft foam, that guarantees support and comfort. Both sides have a soft feet heel area as well as a built-in 6" side perimeter to help ease resident transfers and reduce the risk of falls.

The **Mono Density Mattress** is made of a super comfortable high-resilience, high-density medical grade foam making it very comfortable.

Our Mono Density Mattresses can withstand up to 350 lbs.

Air Mattress

The **Inflatable Mattress System** with vibration is comprised of a mattress, supports located below the mattress, and a vibrator situated on the primary support. The mattress has groups of cylinders with two different sizes alternating along the mattress to achieve a variation in the points of the pressure for the prostrate patient, which in turn reduces pressure ulcers.

This new air mattress periodically redistributes pressure by repeatedly loading and unloading the pressure beneath the patient. Unloading, or pressure removal, is typically achieved through the alternate inflation and deflation of a series of air-filled cells, giving rise to the more traditional description of 'alternating therapy.' Unlike standard mattresses, cyclical pressure redistribution continues even when the patient is not voluntarily moving. The additional benefit of vibration reduces the risk of pneumonia and minimizes labored breathing.

All of our mattress are available with your choice of **Sealed or Hidden Zipper covers**

Our covers help provide comfort, safety, and easy maintenance in institutional settings. The vinyl covers are antimicrobial, antibacterial and easily cleaned.

Available with two and four-way stretch vinyl

Our **Promise** to You

If we cannot manufacture it or immediately help you with our in-stock supply, we will assist you in sourcing it.

What makes us **different**

Using your own **custom artwork** or designs is a great way to create a unique mattress or cover.

Ask about **custom fabrics**. We have access to hundreds of fabrics and colors.

Are you looking for a **custom size** mattress, topper, linens, or mattress protector? We can do almost any size or shape. We can do cut corners, radius corners, beveled edges, and odd rectangular dimensions! We also are able to customize the arrangement of layers and densities to fit your exact needs.

For easier shipping, many of our products arrive **compressed**. Maximum decompression time is less than 10 minutes.

All of our mattress products can be made for **bariatric** application with the same foam combination in an 8-inch depth.

U.S. FOOD & DRUG ADMINISTRATION

All of our mattress are **FDA approved** and meet the 16 CFR 1632 and 1633 flammability standards set forth by the Consumer Product Safety Commission (#3009983869).

HAVE A QUESTION?

AUSTIN Healthcare Solutions takes pride in our knowledgeable staff and direct relationship with all of our clients. We will not only meet your requirements, but exceed them, whatever the type of health care product you need.
